EVOSYS expands global presence in Poland and Turkey

Since the beginning of the year, Evosys Laser - with its representatives TRUmachines in Poland and Tamsa Makina in Turkey - has strengthened its global presence. Both companies already have elementary experience in laser plastic welding. This allows EVOSYS to offer even better local support and high flexibility to its worldwide customers.

Erlangen, March 2022: EVOSYS has been working successfully with both new representatives for many years, and joint projects have already been implemented several times in the past. In both countries, it will drive the further business development of the Evosys Group but also that of its partners.

TRUmachines in Poland manufactures special machines, workstations and tools for the fields of automation technology, materials handling, CNC machining, PLC programming and 3D modeling and converts them into modern, user-friendly machines. In addition, the experienced family-owned company designs complete production lines and processes.

It's Technical Manager, Mr. Tomasz Uzar, has already supervised laser welding processes in previous projects and is very familiar with the process and Evosys equipment. In addition to his native language, he speaks fluent German and English. Holger Aldebert, EVOSYS Managing Director is convinced: "Many of our customers with production sites in Poland will benefit from his knowledge and valuable contacts."

The advantage for TRUmachines is equally obvious: the special machine builder can fully rely on the manufacturer's expertise in the key process of laser plastic welding. Initially, the company will take over the distribution of Evosys laser welding machines in Poland; later, on-site service is also planned.

In order to meet the increasing demand from Turkey, EVOSYS was also able to win its long-standing partner Tamsa Makina as an agent at the beginning of the year. The company has great experience in implementing solutions in laser material processing, has been selling branding, coding and packaging systems for over 20 years and also offers after-sales service for them.

For several years, they have also been on the market with their own marking laser "TAMLAZER". With Tamsa Makina and the contact person there, Mr. Metin Balli, EVOSYS gains market access in this region to important industries such as automotive, electronics, packaging and medical technology. In return, the Turkish company is gaining further experience in laser welding of plastics; thus, it will support EVOSYS customers in the future by providing first-level support in the Turkish region.

About EVOSYS:

Evosys Laser GmbH develops and manufactures tailor-made systems for laser welding of plastics. With many years of market and process experience of its employees, the company offers creative and innovative solutions for integration into automation solutions worldwide. A service package ranging from design consulting and sample production in the company's own Technical Center rounds off the product range.

The company has already received several awards, such as the TOP 100 Innovations Champion award in the year 2020. There are also intensive contacts with the university location Erlangen-Nuremberg and the ~~Bavarian Laser Center~~ Bayerisches Laserzentrum.

The Evosys Group consists of four companies, the parent company Evosys Laser GmbH, the subsidiary Evosys Laser Services GmbH and the subsidiaries Evosys (Suzhou) Laser System Co., Ltd. in China and Evosys North America Corp. in USA.
